Summary

Databricks Certified Data Engineer Associate and Associate Software Engineer at Accenture with hands-on experience building scalable ETL pipelines using Databricks, PySpark, Spark SQL, and Delta Lake. Skilled in Medallion Architecture, Delta Live Tables (DLT), Auto Loader, and Structured Streaming for batch and real-time data processing.

Technical Skills

Programming Languages: Python, SQL, Java

Big Data: Apache Spark, PySpark, Spark SQL, Databricks SQL, Delta Lake

Data Engineering: ETL Pipelines, Data Warehousing, Data Modeling, Medallion Architecture, Delta Live Tables (DLT), Auto Loader, Structured Streaming, Partitioning, Unity Catalog

Cloud: Microsoft Azure, Azure Data Lake Storage (ADLS Gen2), Azure Data Factory

Databases: MySQL, SQLite

Tools: Databricks, Git, GitHub, Jupyter Notebook

Projects

SF Fire Lakehouse Pipeline | *PySpark, Delta Lake, Auto Loader, Delta Live Tables* | [GitHub](#) **2026**

- Processed **4.38M+ records** using Medallion Architecture (Bronze, Silver, Gold) on Databricks for scalable data processing.
- Built batch and streaming (Auto Loader), and Delta Live Tables pipelines for scalable data processing.
- Applied data transformations and data quality constraints; optimized Delta tables using **OPTIMIZE**, **VACUUM**, and partitioning for performance.

Food Delivery Data Pipeline | *PySpark, Delta Lake, Auto Loader, Spark SQL* | [GitHub](#) **2026**

- Developed batch and streaming data pipelines using PySpark and Delta Lake.
- Created Delta tables and performed SQL-based analytics including joins and aggregations.
- Implemented Auto Loader streaming with checkpointing and schema evolution; used **MERGE** / **UPSERT** logic for incremental loading.

NEO Bank Data Pipeline | *PySpark, Auto Loader, Delta Lake, Workflows, Unity Catalog* | [GitHub](#) **2026**

- Built a metadata-driven ingestion framework for a banking dataset, using SQL Server as the source system.
- Designed metadata-driven Auto Loader ingestion from source to Bronze layer, with JDBC connections and secret scope-based credential management.
- Built Bronze-to-Silver-to-Gold transformations and orchestrated the pipeline end-to-end using Databricks Workflows/Jobs.
- Implemented Unity Catalog governance and built a Databricks Dashboard for BI consumption of pipeline outputs.

Experience

Accenture **Mar 2026 – Present**

Associate Software Engineer

Chennai, India

- Completed Enterprise Data Engineering Training (Oct 2025 – Jan 2026) covering SQL, Python, PySpark/Databricks fundamentals, and Azure basics prior to joining.
- Developed ETL pipelines using Databricks notebooks, PySpark, and Spark SQL for batch and streaming data processing.
- Built Medallion Architecture (Bronze, Silver, Gold) pipelines using Delta Lake, Auto Loader, and Delta Live Tables.
- Followed SDLC and Agile delivery practices, collaborating cross-functionally using Git on application development tasks.

Education

Panimalar Engineering College, Tamil Nadu **Jul 2021 – Apr 2025**

B.Tech – Computer Science and Business Systems (Anna University)

CGPA: 8.97 / 10.0

Certifications

Databricks Certified Data Engineer Associate – Databricks	May 2026
Databricks AI Agent Fundamentals – Databricks Academy	Apr 2026
Databricks Generative AI Fundamentals – Databricks Academy	Apr 2026
Databricks Fundamentals Accreditation – Databricks Academy	Apr 2026
Oracle Certified Generative AI Professional – Oracle	Jul 2024
Oracle Certified Java SE 11 Developer – Oracle	Apr 2024
